

# LIBERTY HIGH SCHOOL

## 2023-24 SCHOOL YEAR | ONLINE OPTION

The northern portion of the district has experienced continuous growth over the last several years, with the greatest impact felt at Liberty High School.

Liberty High School is built to serve 2,100 students and is projected to serve more than 2,800 students in the 2023-24 school year.

To address this continuous growth, Liberty High School is offering a distinctive opportunity for students to experience high school in person with an eCampus course during 2nd hour.

## Here are a few reasons why students may love the 2nd hour eCampus option:

- 👉 Students who do not get into high demand classes, such as Culinary Arts, can still take the course through eCampus and meet the pre-requisite to go on to subsequent classes in person for that CTE strand.
- 👉 If your child would rather not take PE in-person, eCampus has an online PE option that students can take to still meet the graduation requirement.
- 👉 There are a variety of Honors and AP course options offered through eCampus for your child.
- 👉 If your child is involved in athletics, taking an eCampus course could offer some additional coursework/study time for students that need extra time on their schoolwork.
