

Want a fun, engaging, non-traditional math experience this summer? If so, please join us as we embark on daily collaborations, games that will be fun (but also include mathematics), logic puzzles and thought-provoking questions. This can be something your student can do individually, or you can participate as a family! The expectations include a daily log in with the summer school teacher and minimal application outside of the online participation. We will have dynamic math experts running this program and they look forward to challenging your child(ren) to think as they make math fun! The sessions will be June 8th-11th and June 15th-18th. You can sign your child(ren) up for one or both sessions.

If you are interested, please take just a few minutes to fill out the below Forms survey by this Friday, May 29th, so we can begin to plan and prepare materials.

You will need the internet to access the teachers, and the resources. **If you checked out a laptop from the district, then you CAN keep it until the end of our Math Lab session. We will set up a drop-off time after the 18th.**
