DUO Two-Factor Authentication for Students

Duo is Maricopa Community Colleges' two-factor authentication service providing an extra layer of security to protect against hackers, cyber threats, and any unauthorized access to sensitive data.

A safe and secure way for students to access their online accounts, Duo verifies a student's identity through two factors: a password (something that is known) and a device (something they have, such as a smartphone).
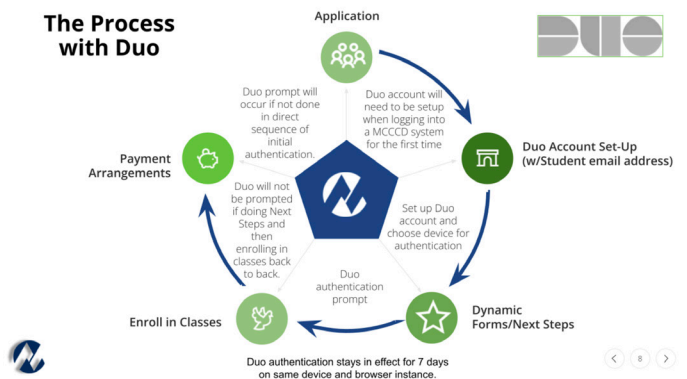

How to Set Up Duo

Duo Mobile

1. Download the Duo app from Apple or Google Play store (complete in a timely manner).
    a. Go to the Duo website to learn more options if not using a smartphone.
2. Follow the Duo set-up instructions. Your student email account (MEID@maricopa.edu) is required.
3. Add your phone number.
4. Choose your device.
    a. iPhone or Android Smartphone (more secure & recommended option)
    b. iPad or Tablet (next best option)
    c. Traditional cell phone
    d. Landline
5. Log in to a Maricopa system.
6. Start using Duo two-factor authentication when prompted through your device choice.

    Please note: *The device used to setup the Duo account should be the student's device that will be with them each time they need to authenticate Duo when logging into Maricopa systems.*

Enrollment Process with Duo

The Process with Duo

Your authentication as a student is good for 7 days when using the same browser and computer you authenticated. If you attempt to log in to a Maricopa system on another computer, then you will be prompted to authenticate.
