

What is YouScience Aptitude & Career Discovery?

Help students discover their natural aptitudes and connect them to highly personal and relevant pathways for success.

What is an aptitude?

An aptitude is an individual's natural ability to learn or perform in given areas. Aptitudes are not the same as interests, personality or learned skills, which are environmentally dependent and change over time. Aptitudes are established at about 14/15 years old.

Ties to careers:

Aptitude and career discovery matches student aptitudes with 500+ careers, including top 15–20 best fit careers. Career matches also include salary ranges, projected opening, education requirements, day-in-the-life insight, and more to help students communicate their strengths, results include self advocacy language to assist with resumes, applications, essays, and interviews.
