// ABOUT MET

The **MET Professional Academy** is designed to motivate students by treating them as working professionals and preparing them for post-secondary education and careers in high demand STEM fields. Unlike any other program available to high school students in the West Valley or the state, Peoria Unified students have the direct benefit of attending programs while still in high school that help them not just receive dual enrollment, but propel them to careers in the fields of medicine, engineering, technology, bioscience and global business.
