

Headlining Story – Purpose of MET Weekly

2022/23 MET Students,

We are excited to announce the MET Weekly, a weekly newsletter for the MET Professional Academy! This newsletter will serve as place where the MET student ambassador team can share important information about upcoming events, community service, and what is going on around the MET Professional Academy. The MET Weekly will also regularly highlight students across MET who go above and beyond and are a good representation of the values of the MET Professional Academy. We are excited to be able to connect better with students across all strands and look forward to a great year!
