Check it Once, Check it Twice, Check it...

One of the first items on your to do list during the first week of your online experience should be to understand the steps on how to check your course grade. Checking your course progress regularly is a part of taking ownership and responsibility for your learning. Although eCampus instructors send regular progress reports to your Peoria Unified student email account, you have 24/7 access to your eCampus grades via StudentVUE.

Checking your course grade consistently allows you to see your progress over time. You can also reach out to your instructor if you have any questions or concerns about your grade. You will need to login to StudentVUE using your student district username and password.

You should make it a habit of checking your grade(s) every week. In the end, your course grade should never be a surprise.
